

Help Protect Clough Pond!

Please consider becoming a Lake Host volunteer at Clough Pond to help prevent the spread of invasive weeds.

Loudon and surrounding towns, already have ponds, lakes and rivers that are infested with variable milfoil and other exotic weeds that choke out the oxygen for fish and make swimming and boating unpleasant. Once established, these weeds are impossible to completely eradicate.

As a Lake Host Volunteer, you will help prevent weeds from being transported into our weed free pond and educate boaters how to prevent their spread. Volunteers, ages 18 – retired, only need to work a few hours throughout the entire season.

Please consider helping and pass the word along to your neighbors who use the pond.
