

Epp's Mill Town Trail

Description:

The Epp's Mill trail consists of a pleasant 1 mile down and back wooded trail with a small loop. The trail is accessed from Kenney Road via a small foot bridge. The trail follows active Academy Brook that was used during the 1700's-1900's for water mills that powered activities such as shingle making, saw milling, and cider pressing. The historic Epp's Mill site hosts impressive stone foundations, and it was host to the first electrified home in Loudon, run by a turbine from this brook. This short trail provides ample opportunities for views and exploration of regional history. Please be respectful and keep to the marked trail for it is located on private property. Motorized vehicles are prohibited.

Location:

The Epp's Mill Trail can be accessed from Kenney Road in Loudon NH. The trail begins from the road with a pedestrian bridge, the kiosk and map are located on the edge of the forest. When traveling from Loudon Ridge Road travel 2.0 miles before taking Lower Ridge Road. After another 0.5 miles turn left onto Kenney Road. Nearly 0.5 miles down Kenney Road on the right is where you will find the trail. When coming from Clough Hill Road travel 0.2 miles before staying left on Lower Ridge Road. On Lower Ridge Road you will travel 2.6 miles until turning right onto Kenney Road.

- The project was a community effort with many individuals volunteering their time, companies donating supplies, and funds from the Loudon Conservation Commission.
- The trail is managed by the Loudon Trails Subcommittee of the Loudon Conservation Commission.
