Loudon Trick or Treat Stay Safe & Healthy Guidelines

Saturday October 31st, 2020 4:00 p.m. until 7:00 p.m.

In an effort to maintain the tradition of Trick or Treat in the safest way possible during the Covid-19 Pandemic the Town of Loudon is offering the following safety guidelines

If you do not wish to have your home participate in giving out treats, you may simply dim your lights and even include a sign if you wish.

Homes who are participating in Trick or Treat Should ……….

1. Only give out wrapped items.
2. Give out items outside, on a table, keeping 6 foot social distancing, or behind a storm door and replace treats before each visitor or group.
3. Use a 6’ plastic tube to slide treats to children.
4. Do not hand treats directly to children.
5. Make available hand sanitizer
6. Should do everything possible to create a one way traffic flow. Possibly set up a table at end of driveway or walkway so people are not passing on walkways or steps to your porch.

Trick or Treaters who are participating should……………………

1. Trick or treat in small groups, preferably with immediate family members only and within your own neighborhoods.
2. Avoid large groups and going inside homes.
3. Carry hand sanitizer, disposable gloves are not recommended.
4. Wear protective face masks / coverings (This may be part of a costume if its cloth)
5. If you are uneasy about getting treats by going door to door and would like your children to have the experience you can certainly go for a walk about and bring your own treats to provide your children but still be able to see everyone else in their costumes while maintaining the 6’ foot social distancing.

These Guidelines may be adjusted at any time based on updated recommendations from the CDC and or State of New Hampshire. Please watch the town’s website at www.loudonnh.org for up to date information if any changes occur. For more information or questions please email chief@loudonfire.com.
